

#Installing Learning locker Cheat Sheet

#This only works on Ubuntu 18.04+

#If you use any other

#Login as Root

#goto roots home folder

Cd ~/

#This reached out to the Learning Locker and grabs it

wget -qO deployll.sh <http://lrnloc.kr/installv2> && bash deployll.sh

#On the password when it asks this needs to be 8 characters and include alphanumeric or you'll

#have to manually run the admin script

#Extra Snippets Commands

#####

#Restart Services

service pm2-learninglocker restart

#Check Status

pm2 status
